**Subject:** Facilitator for mtg Tues 4/12, 11-12:30 pm?

Dear Lori,

Do we still have an R9 roster of trained facilitators? I have a mtg next Tues re radiation topics with Greenaction and their technical advisors from UC Santa Cruz. It's a technical meeting with the Navy, DTSC, and EPA. Most participants will be on the phone, since they are located in different cities. It may have 13-20 people. Though Dan Hirsch is likely to be the main spokesperson. Bradley Angel asked us to set this up. I asked Bradley if he wants to use his own facilitator, Regan. But I wanted to also see if we have any, in case Regan is not available.

Here's the draft agenda:

1. Derivation of remediation goals for radionuclides - 10 min
2. Risk estimates calculations - 10 min
3. Consistency with EPA methodology - 10 min
4. Disposal requirements - 10 min
4. CERCLA risk assessment process - 10 min
5. Misc. Topics - 15 min
6. Document availability - 5 min

This is based on the questions below from Dan Hirsch, the head of USCS's Nuclear Policy Program:

Among the technical issues about which we have questions and for which it would be helpful to

have your technical people available who can answer questions in those areas are:

1. How the remediation goals for radionuclides were derived.
2. How the risk estimates for specific estimated radiation doses were derived, and how those doses themselves were derived.
3. The standards that have been and are being used to declare materials to be or not be low-level radioactive waste and where these materials have been and are being sent for disposal or recycling.
4. Questions about pre- and post-remediation risk assessments for both chemicals and radionuclides.
5. Numerous questions about status of characterization, environmental impact review, and remediation for different portions of HPBV.
6. Availability of various key documents.

We have some general questions about the above subject areas, but also detailed specific technical questions
